EXPERIENCE

ART DIRECTOR

ACTION LEARNING LLC. | OCTOBER 2013 – PRESENT

In first three days I have made complete project design approved by client. Next two weeks we have released this course for international brand. That was speed and quality record in company. I have great testimonials about working with me from designers and developers. I've raised an employee: he was a designer who worked in company more than one year. With my mentoring he became an art director in one month. I have implemented idea about design process automation with better graphics quality and speed-up process of course development.
